TECHNICAL SKILLS

JavaScript
React.js
Ruby

Ruby on Rails
Sinatra
SQLite

PostgreSQL
HTML
CSS

PROJECTS

Get Together - [GitHub](#) | [Demo](#)

Group texting can be annoying and not everyone uses social media. Get Together with friends with minimal hassle.

- Created authentication mechanism using Context in React frontend.
- Leveraged Material UI library for consistent styling components.
- Implemented navigation using React Router.
- Built Rails API and React frontend in the same repository to support single domain deployment.
- Designed and created database schema and logic using Active Record and PostgreSQL.

Lessons learned: Dove into more advanced Rails concepts around Active Record associations, strong params and nested attributes.

Project Tracker - [GitHub](#) | [Demo](#)

Manage clients, employees, and projects simply. Easy adoption for small business owners.

- Maintained ease of deployment by building React frontend withing directory Rails Backend.
- Designed and coded database schema and logic using Active Record and PostgreSQL.
- Used CSS for styling components.
- Incorporated client-side routing using React Router.

Lessons learned: Investigated Rails to replicate the Sinatra functionality for the backend.

Bucket List - [GitHub](#) | [Demo](#)

Organizational application for users to keep track of their bucket lists.

- Created Sinatra API backend that uses Active Record and SQLite to access and persist data in a database.
- Built a separate React frontend application that interacts with the API to perform CRUD actions.
- Leveraged Material UI library for styling components.
- Implemented navigation using React Router

Lessons learned: Incorporated backend into frontend knowledge using Sinatra

RECENT EXPERIENCE

JPMorgan Chase & Co.

Gardnerville, Nevada

Lead Associate of Operations

08/2020 – 11/2021

- Onboarded and trained new staff members in banking regulations, audit requirements, computer systems, and operational procedures
- Supervised day-to-day operations of 6 employees
- Maintained the branch's "Top 3" regional rank for monthly operation reports

Teller

10/2018 – 08/2020

- Educated customers on standard banking practices (fraud detection) to save them thousands of dollars
- Processed financial transaction for hundreds of customers per week with zero incidents
- Handled sensitive personal information and large sums of money with little oversight

Rosneft

Russia

Procurement Specialist

08/2015 – 04/2017

- Managed order requirements and monitored quality standards of materials for oil and gas projects
- Liaised between project managers, contract management teams, logistics teams, and vendors to satisfy order requirements and changing supply needs
- Generated and distributed SAP status reports of project materials, which were sent to over 500 staff members
